

Two Utilities. Big Savings Potential. FREE!

Aurora Water and Xcel Energy are collaborating to lower utility costs for local multifamily buildings.

Reducing your building's water and energy use can lower utility costs for your building. What's more, saving water offers a double benefit of saving energy, since it takes energy to deliver hot water. Aurora Water and Xcel Energy are making the transition to a more efficient facility easy.

An **Xcel Energy** representative will:

- ✓ Identify energy-saving opportunities
- ✓ Install free energy-saving products like faucet aerators and showerheads in each unit where those high-efficiency products don't already exist
- ✓ Identify high return-on-investment upgrade opportunities
- ✓ Help you navigate available rebates to make savings easy

Aurora Water will:

- ✓ Provide an overview of usage data to identify possible inefficiencies
- ✓ Complete a walk-through of your property to identify water-saving opportunities
- ✓ Suggest custom recommendations for water fixture and appliance updates
- ✓ Offer assistance identifying rebates

WATER**

PARTNERS IN ENERGY
An Xcel Energy Community Collaboration

Take advantage of this special collaboration!

To be eligible, you must meet all of the following:

- ✓ Be an Aurora Water customer.
and
- ✓ Receive Xcel Energy electric and/or natural gas service at the property. Check your gas and electric utility bills to confirm that you are an Xcel Energy customer.
and
- ✓ The property must have five or more units per building.
and
- ✓ The property can be either market rate or income qualified.

How long will it take?

The combined assessment typically takes around 2 hours depending on the size of your building.

Ready to maximize your savings?

Connect with Aurora Water today and mention your interest in a dual assessment. Aurora Water will do the work for you to make scheduling both assessments easy!
